

THE SENTIENT CITY

Hawke Research Institute Annual Distinguished Lecture by Sir Nigel Thrift

Wednesday 28 September 2016, 6.00pm
Bradley Forum, UniSA City West campus

Touch screens, virtual landscapes, location tagging and augmented realities are creating a new spatial awareness with major consequences for how we understand ourselves, others and the wider world.

In this provocative lecture by one of the world's leading geographers, **Sir Nigel Thrift** examines what kinds of technological practices are becoming commonplace in cities today. Thrift reconsiders what a city which is aware of itself might look like, and what this means for all of us living in the twenty-first century.

Sir Nigel Thrift is Executive Director of Schwarzman Scholars, and the former Vice-Chancellor of the University of Warwick, UK.
